Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Wanner (US Patent 5,812,648).

Claim 1 is limited to **an improved Caller Control System for a receiving telephone line**. Wanner discloses a telephone ringer control device (abstract; figure 3, element 40) (i.e. **a Caller Control System**). The control device includes a caller ID processing system (60) (i.e. **a Caller I.D. system for the telephone line**). Wanner discloses that the control device and caller ID processing system are incorporated fully into an answering machine (column 4, lines 43-48) (i.e. **the Caller Control System and Caller I.D. system coupled to a voice mail system for the receiving line**). The operation of an answering machine, while not explicitly disclosed by Wanner, inherently answers incoming telephone calls after a predetermined amount of rings have occurred (i.e. **shunts incoming calls to a voice mail system...**). Wanner discloses that when a calling number is not recognized by the caller-ID processing system the ringer is not enabled on the telephone (column 4, lines 6-23), and thus, the answering machine will handle a missed call without ever ringing the telephone (i.e. **without ringing**

unless the incoming caller is on an approved caller list...). However, the ringer can be enabled if the caller enters an override code (column 4, lines 24-28) (i.e. **or properly accesses the Caller Control System with an appropriate password**). Therefore, Wanner anticipates all limitations of the claim.
